Debates about the use of non-human animals for medical research tend to be cast in terms of a trade-off between the suffering and destruction of the animals used and the promotion of human health and well-being. In this talk, Dr. Lori Gruen, author of *Ethics and Animals: An Introduction* (Cambridge University Press) will suggest that this way of framing the debate is problematic and will argue that a deeper recognition of the moral costs of both sides may help move the discussion forward.

7:00 PM, September 14
H. F. DeLuca Forum, Wisconsin Institutes for Discovery
330 N. Orchard St., Madison, WI 53715

Parking available in lots 17, 20, 36, 40, 41. For map, event updates, and more information, visit our website: www.science.wisc.edu/events-forum-on-animal-research-ethics.htm

The University of Wisconsin-Madison Forum on Animal Research Ethics (FARE) is committed to providing opportunities for the community, including citizens, students, and researchers, to engage in dialogue about the ethics and outcomes of the use of animals in research.
